- React, Next.js, Remix
- TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind
- GraphQL APIs, RESTful APIs
- Python (web scraping)
- MySQL, PostgreSQL, MongoDB
- Cypress, Jest (automated testing)
- Azure, CI/CD pipelines, Git, GitHub
- Jira, Agile/Scrum

LANGUAGES

- English (Intermediate)
- Romanian (Fluent)

PROFILE

Fullstack Developer with 3+ years of experience building modern, responsive web applications using React, Next.js, TypeScript and GraphQL. Strong focus on clean architecture, automated testing (Cypress, Jest), and scalable backend development with Node.js and Python. Passionate about delivering user-friendly solutions, working in agile teams and continuously learning new technologies. Open for frontend, backend or fullstack roles in dynamic environments.

WORK EXPERIENCE

Fullstack Developer – AQUASoft S.R.L. 2022- PRESENT
Bucharest, Romania

Participated in the full software development lifecycle, delivering modern web applications for various clients. Main focus on frontend development with React and Next.js, as well as backend services with Node.js and GraphQL. Worked in agile teams, contributed to test automation and CI/CD.

- Developed user-friendly, responsive interfaces using React, Next.js, Remix, and TypeScript.
- Designed and implemented GraphQL APIs for seamless frontend-backend integration.
- Worked with MySQL, PostgreSQL, and MongoDB to manage data models and queries.
- Contributed to a Python-based scraping project, automating data collection pipelines.
- Actively collaborated in agile sprints, using Git, Azure DevOps, and Jira.

EDUCATION

Bachelor's Degree in Computer Science – Thesis pending 2017- 2021
Transilvania University of Braşov, Faculty of Electrical Engineering and Computer Science

- Focus on high-level programming (C, C++, Java, Python)
- Web development: JavaScript, React, HTML, CSS
- Relevant coursework: Software Engineering, Databases, Algorithms, Microcontrollers

High School Diploma – Electronics Technician 2013 - 2017
Energetic Technological High School
